

Could you put a price on the life of a loved one?

Log onto www.masterelectricians.com.au to book your electrical safety check today

or contact your local Master Electrician:

Every year, 15 people are killed in electrical accidents,
all of which could have been prevented. What would you do to save a life?

Electrical Safety Matters

Did you know?

- 15 people are killed in Australia each year as a result of electrical accidents that could be prevented
- As many as 20 times that number are hospitalised with serious injuries and burns
- Many electrical items in both stores and available online do not comply with Australian standards
- Adding a safety switch to a switchboard costs less than many electrical appliances
- A safety switch will detect any imbalance of power associated with electric shock and stop the flow of electricity in less than a heartbeat, which could save a life

Protect your family's safety

Book a home safety check today!

Your local Master Electrician is offering a Home Safety Check for just \$150* inc. GST. This includes a safety check of your home to identify safety switches and examine electrical wiring, light switches and power points to ensure your home is safe. It is always better to be **safe** than **sorry**.
